Treasury Department,

Office of the Treasurer,

Washington, D. C., September 3, 1895.

To the

Superintendent of the Mint U.S.,

Philadelphia, Pa.

Sir:

For your information and guidance in counting the silver coin forwarded to you by the Assistant Treasurer U.S., New York, for storage, I enclose a copy of a letter received from that officer. In another letter the Assistant Treasurer U.S., raises objection to the use of the counting board in counting the coin, and I have therefore to request that the coin be counted entirely by hand. Referring to a letter from this office in which it is stated "The transfers will be suspended until the coin now in your hands has been counted", I have to inform you that at the time your letter was received the Assistant Treasurer was preparing to make a shipment of coin, transfer order No. 2810, and as the suspension of the same is causing him some inconvenience, I have deemed it proper to direct him to forward that shipment to you on the 4th. The future shipments will depend on your ability to handle the coin,

and I have to request that on completion of the count of the coin covered by each transfer order, this office and the Assistant Treasurer U.S., New York, be informed of the result, and that the request of the Assistant Treasurer in regard to the tags attached to the bags of coin be complied with.

Respectfully yours,

Treasurer U.S.

B.
